Spend to Cut
$30.4K

Spend to Optimise
$7.1K

Spend to Scale
$34.8K

If CTR Low:
Test stronger hooks, visuals, and tighter audience targeting before increasing budget.

If CVR low:
Traffic is not converting efficiently, suggesting friction between ad engagement and on-site purchase intent.

If CPA High:
Rising acquisition costs are placing pressure on campaign profitability and reducing return efficiency across spend deployment.

If ROAS High:
Strong return efficiency suggests capacity for incremental budget expansion without immediate profitability concerns

Next 0-7 Days

Pause or reduce spend on TikTok_Viral_Push — ROAS is 0.74x vs break-even 2.95x.

Pause or reduce spend on Influencer_Collab — ROAS is 0.95x vs break-even 2.95x.

Pause or reduce spend on Generic_Search — ROAS is 0.80x vs break-even 2.95x.
