High-Value Zones

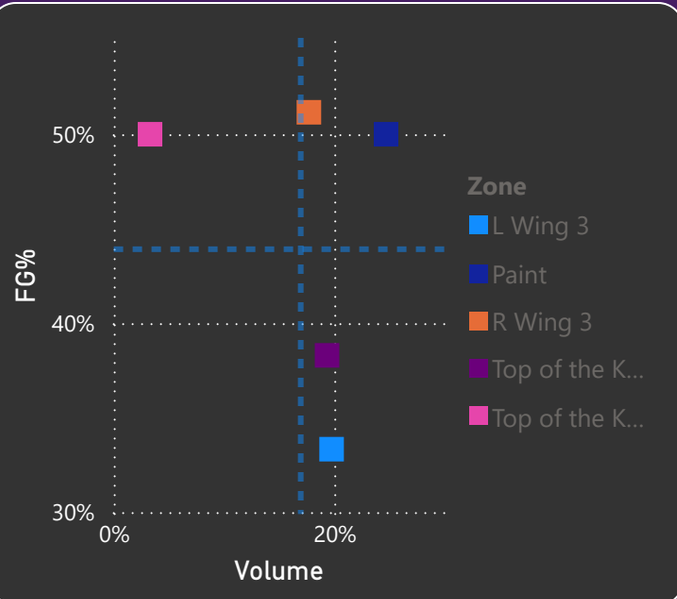

Shot Distribution Status

Current shot mix is well-aligned with efficiency profile.
No season-long underutilized strengths detected

Low-Value Zones

- L Wing 3 (33.3%) – Primary Refinement
- Top of the Key 3 (38.3%) – Secondary Refinement

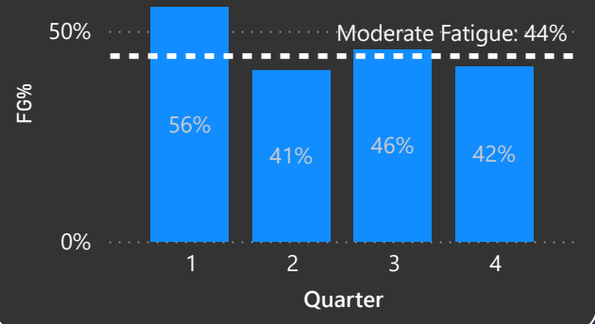

Zone	FG%	Δ from Season FG%	Efficiency Signal
L Wing 3	33.3%	-12.3%	Drill ⚠
Top of the Key 3	38.3%	-7.4%	Drill ⚠

Fatigue and Consistency Analysis

FG% by Quarter

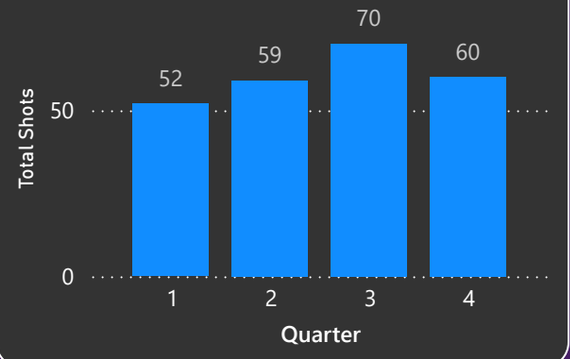

Average FG% Variation per game

7.8% - Mild Variance

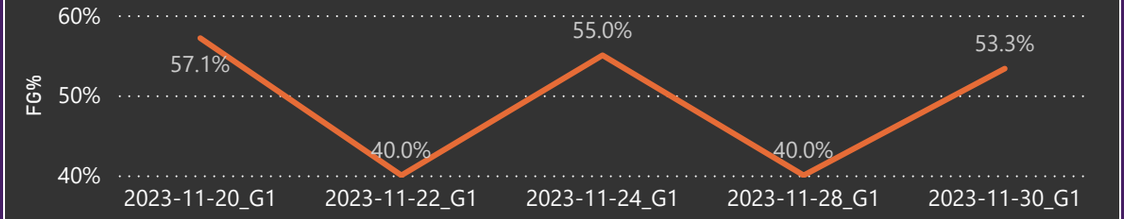

Late Game Classification

Shot Profile Shift Impact

Attempts by Quarter

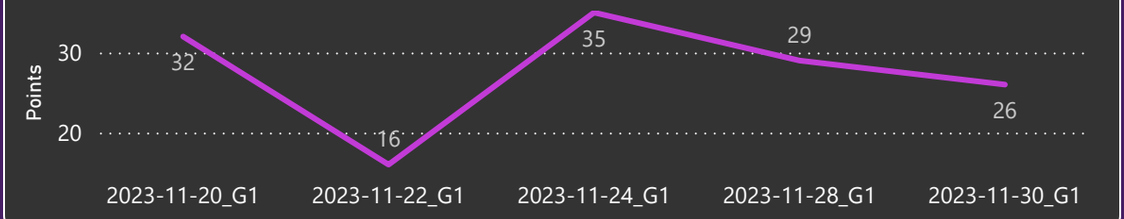

FG% - Last 5 Games

Q4 vs Q1 Delta: -14.1% ▼ - Severe Decline

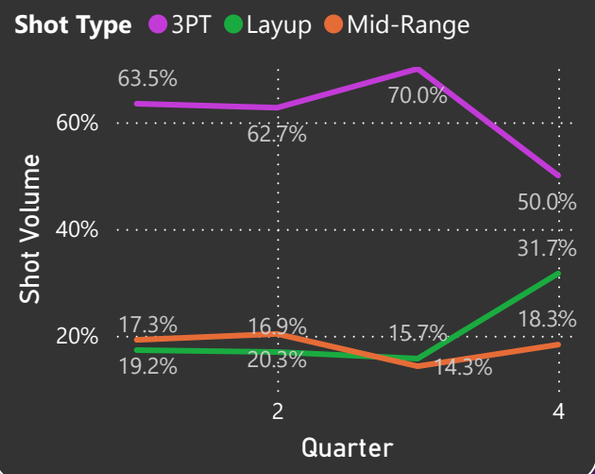

Points - Last 5 Games

Q4 vs Q1 Attempt Rate

15.4% Increase

Shot Volume by Quarter

Q4 vs Q1 Shot Volume Analysis

Significant efficiency decline aligned with shot profile change (In Q4, Layup increased by 14%, while 3PT decreased by 13% relative to Q1), indicating shot selection impact.

Q4 vs Q1 Attempt Rate Analysis

No significant volume-adjusted efficiency pattern detected.

Overall Stability Score

18.12 / 100 - High Volatility

Action Plan

Performance Snapshot

Target Stability Score: > 60 within next 5 games.

Q4 vs. Q1 Delta	Q4 vs Q1 Attempt Rate	Q4 VS Q1 Shot Selection	Overall Stability Score
-14.1% ▼	+ 15.4% 🔺	Layup: +14.4%, 3PT: -13.5%	18.12 / 100 - High Volatility

Primary Focus: Efficiency drop aligns with a tactical shot adjustment. Review late-game coverage response.

Drill Prescription

Main Focus: Shot Selection Consistency

Session Block:
- 20 Q4-simulated attempts.
- Cap pull-ups or low-efficiency zone attempts at baseline rate.
- Target: No over-representation of lowest efficiency zone.

Behavioural Adjustment

Shot distribution shifts in high-leverage possessions. Determine whether adjustment reflects tactical design or forced deviation.

Zone Refinement

- L Wing 3: Prioritize shot preparation and balance under game speed.
- Top of the Key 3: Increase consistency and confidence from this spot.

Monitoring Metric (Monthly Target)

Increase L Wing 3 from 33.3% to 44.1%.

Increase Top of the Key 3 from 38.3% to 44.1%.
